Administrative Order No. 23
Series of 2004

SUBJECT: Guidelines on Post Adoption Services

I. RATIONALE:

In recent years, the Department has received an increasing number of inquiries for assistance in the search and reunion and referrals for counselling about issues on adoption.

Studies has shown that children relinquished for adoption have tremendous losses to grieve, traumas to heal, feelings and negative experiences to process and many significant questions to resolve within oneself.

Whatever may be the reasons, adoption means uprooting the children from their innate origins, thus affecting their essence and identity. Adoptees aggressively try to find ways to know his/her family background and to have access to personal information/records about the adoption.

It is indeed a challenge to address this concern. Through education and provision of pre-adoption services, adoptees and biological parent/s separated by adoption and the adoptive parents have now become more open and agreeable to share information and establish contact with each other. The “tracing of roots” is a means to enable the adoptees recover their self-worth and to experience the completeness of one’s being. Likewise, the biological parent/s would have the opportunity to heal the loss and guilt feelings over the relinquishment of the child. As a participant to the effort to connect with their child’s roots, the adoptive parent will be able to confront their fear of losing the adoptee.

In this context, it is timely to set right the preparations and procedures of post adoption services in compliance to local laws and international commitments governing adoption.

In view of the foregoing considerations, the guidelines on post adoption services is hereby developed/formulated for implementation.

VII. IMPLEMENTING PROCEDURES:

3. The applicant shall be required to submit available documents pertaining to the adoption such as original birth/foundling certificate, amended birth certificate, placement authority.

4. Generally, the outline of the search process is as follows:
   - Initial contact (phone, letter, e-mail or personal visit) shall originate from adoptee, adoptive parent/s or birth parent/s.
   - Thorough review of all case materials pertaining to adoptee, birth parent/s and adopter and assessment of the most viable approach to meet the request and the need of the applicant.

2. When reunion is decided, preparations of all concerned must be carefully planned to avoid any possible negative experience. The social worker must also consider the decision and readiness of the adoptee and the biological parent/s on whether to involve the significant person/s in their present lives.

3. The timing of any approach to family members is very critical and incredibly important at this point. The social worker must be aware of the impact on all parties desiring contact. He/She must be able to offer a mediating approach to support people at this time, and to try and negotiate an agreeable outcome for all concerned, while at the same time providing support throughout the process.
